

BeFinder Manual System
Starter Kit Price List
Consumables and equipment needed to setup the
BeFinder Fluorescence Method

Quantity	Product	Unit Price	Unit price when ordered in quantities of 5 units or more	Unit price when ordered in quantities of 10 units or more
Consumables				
1	BeFinder CH-A: Chemical kit- 96 tests: 500ml of dissolution solution (CH-1) and 220ml of detection solution (CH-2). This is enough detection solution and dissolution solution for 96 runs plus 24 standardizations.	\$3,000	\$2,100	\$2,000
1	BeFinder St-A: Set of 5 certified standards for calibration, each in a quantity of 100ml. The concentrations of Beryllium in the standards are 0ppb, 10ppb, 40ppb, 200ppb and 800ppb. Standards used to prepare 1000 calibration curves of five points. Each calibration set can be used repeatedly over a period of three days when stored properly.	\$1,565	NA	NA
1	BeFinder CC-A: Set of consumables for standards	\$600	NA	NA
1	BeFinder CO-A: Consumables kit for samples-96 tests	\$960	NA	NA
Equipment				
1	BeFinder PR-A: Processing kit. This processing kit uses a shaker, which is suitable for all beryllium forms <i>except</i> high-fired beryllium oxide..	\$4,200	NA	NA
1	Fluorometer Turner BioSystems (FI-B) + Optical Kit (FM-B)	\$6,296	NA	NA
	Total	\$16,621		

Prices are subject to change without notice.
 All prices FOB Tucson.
 Sales tax is not included.
